

Application No.: 10/606,819  
Reply to Office Action of November 28, 2005

**Amendments to the Claims**

This listing of claims will replace all prior versions, and listings, of claims in the application.

**Listing of Claims:**

Cancel claims 1 through 2.

3. (currently amended) A system, comprising:

- a bus;
- a plurality of clients coupled to the bus;
- a memory coupled to the bus and shared by the plurality of clients;
- a bus arbiter coupled to the bus, such bus arbiter granting access to the bus in response to whether one of the requesting clients experienced an "address retry" condition during its previous bus access, and if so, granting such one of the requesting clients access to the bus at the earliest opportunity; otherwise providing bus access to the requesting one, or ones, of the clients based on a criteria independent of "address retry" conditions being induced on the bus.

4. (currently amended) A system, comprising:

- a bus;
- a plurality of clients coupled to the bus;
- a memory coupled to the bus and shared by the plurality of clients;
- wherein each one of the clients is capable of inducing an "address retry" condition on the bus, such condition occurring when a memory address introduced onto the bus during a bus access by one of the clients points to a data location in such memory currently being utilized by another one of the clients, such other one of the clients being the client inducing the "address retry" condition on the bus;

Application No.: 10/606,819
